Which portable power station should I buy?

If you need your portable power station to support days of off-grid adventure (and maybe backup your home power), check out the Jackery Explorer 2000 Plus. This power station is our favorite heavy-duty option due to its impressive output (3000W max and 6000W peak) and expandable capacity (up to a whopping 24kWh).

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How much power does a portable power station have?

This entry-level portable power station offers 500Wh, which is about 40 recharges of a smartphone and seven recharges of a laptop. If that sounds enough then there's a lot to like about this pared-down portable battery, which can cope with 11 devices simultaneously.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.

What accessories do you need for a portable power station?

One of the most common accessories is going to be a cord to connect to similar power stations in series, often times doubling your power output. Some portable power stations have a light bar built into the housing, which is useful for seeing at night. Anker's Solix C300 also includes a pop-up camping light.

How to choose a portable power station for camping?

Setting one up inside a home or workshop means close quarters, and loud models could literally require hearing protection. A portable power station for camping should also be quiet, or else it may disturb the neighbors. Typically, electric and solar power stations make for the quietest generators available.
