

110v DC to 220v AC inverter

What voltage does a 110 volt Inverter Supply?

An inverter converts a 110 Volt DC voltage (battery) into an AC voltage (230V-50Hz). The standard output voltage is 230 Volt,50Hz with a pure sine wave. This means that this inverter supplies the same type of voltage as the wall socket. This allows any electrical device to work on it. What should you be aware of?

What is type a power supply inverter?

A) Grid Power AC main Supply: Type A power supply inverter is in the Grid Power AC output mode,when there is AC Grid Power,and automatically switches to the inverter output mode when the AC Grid Power input fails.
