

Contractual reforms and targeted measures to accelerate investments in renewables are key to unlocking ASEAN's potential for a clean energy future. This piece ...

Interested in acquiring or divesting of solar (or other RE) power assets / developers / IPPs / EPCs / manufacturers in ASEAN or interested in ...

Solar power in Cambodia currently only makes up around 7% of the country's energy mix, lagging behind hydropower and non-renewable sources.

In January 2024, the MEMR revised regulations on solar power integration, removing capacity limits on rooftop systems, while implementing a ...

The cumulative installed capacity of solar photovoltaic (PV) systems across ASEAN countries, compiled from IRENA (2018b), is shown in Figure 1. Thailand, Malaysia, Indonesia, the ...

Smart grid can help ASEAN integrate more renewable energy, particularly solar and wind, so as to meet the target share of RE in the energy mix.

There are certain roadblocks in the progress of solar PV deployment in ASEAN. This paper aims to investigate the solar PV policies in the ASEAN region over the past ...

This report provides an assessment of the potential for reducing carbon dioxide emissions through power generation with ammonia fuel. It identifies the strengths, weaknesses, opportunities, ...

2. Remarkable Development of ASEAN Power Grid ASEAN is one of the most dynamic and fastest growing economic regions in the world. It recognizes the critical role of an efficient, ...

The efficient utilization of clean energy resources to meet increasing electricity demand is imposing the integration of the electricity market and the construction of secure ...

Grid is the driver to unlock solar and wind markets and provide opportunities for fossil-dependent countries to be renewables exporters. This report summarises emerging challenges facing ...

Improving Lives of Rural Communities Through Developing Small Hybrid Renewable Energy Systems Despite significant economic growth in Asia in recent decades, millions of people in ...

ASEAN Small Solar Power Generation System

This study focuses on the current state of Solar Photovoltaic (PV) development and implementation in the ASEAN region. The study examines the use of ...

POSCO International announced it has completed a photovoltaic power generation system on Manaung Island near the Myanmar Gas Field. Manaung Island is home to more than 60,000 ...

Interested in acquiring or divesting of solar (or other RE) power assets / developers / IPPs / EPCs / manufacturers in ASEAN or interested in support how to enter and ...

This study focuses on the current state of Solar Photovoltaic (PV) development and implementation in the ASEAN region. The study examines the use of Solar PV+ in ASEAN ...

Among these sources, solar energy has emerged as a highly promising candidate due to its remarkable growth rate. This comprehensive review article aims to analyze the ...

Apricum's latest article provides deep insight into the Vietnamese, Thai, Malaysian, Filipino, and Indonesian markets, drawing from Senor ...

ASEAN member states have set a collective renewable energy capacity target of 35% by 2025. Including all types of renewable power, the region is already close to meeting its goal by ...

With abundant sunlight almost daily, Southeast Asia's solar power players are guaranteed a consistent and effective return on investment, all the while making an ...

About This report tracks solar and wind generation in ASEAN between 2015 and 2022, and analyses the additional capacity needed by 2030 to align with the International ...
