

Solar photovoltaic (PV) is one of the most promising RE technologies. This paper provides an overview of the solar PV developments in the Association of South East Asian ...

The US Commerce Department has imposed preliminary anti-subsidy duties on imported solar panels from four Southeast Asian countries. In an announcement issued on 1 ...

Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure. Operational capacities have been significantly reduced or temporarily halted, ...

Preliminary Affirmative Determinations in the Countervailing Duty Investigations of Crystalline Photovoltaic Cells Whether or Not Assembled into Modules from ...

The article provides deep insight into the Vietnamese, Thai, Malaysian, Filipino, and Indonesian markets, drawing from Moritz's long of experience as an entrepreneur and a ...

Solar cell imports increased throughout the year, likely as more new module assemblers came online. If First Solar produced its full 10.7 GW in 2024, that added to the ...

The U.S. Dept. of Commerce today released its final tariff amounts on solar cells (whether or not assembled into modules) from Cambodia, Malaysia, Thailand and Vietnam.

On November 29, 2024 (local time), the U.S. Department of Commerce announced preliminary affirmative determinations in the anti-dumping (AD) duty investigations on ...

A new round of U.S. solar panel import tariffs on Southeast Asian producers is expected to raise consumer prices and cut into producer profit ...

Southeast Asia has become an important region for Chinese photovoltaic enterprises to export to the US market. According to statistics, as of 2023, the main supply of photovoltaic ...

In clean power, the region is already a global exporter of solar photovoltaic (PV) cells and modules. Leveraging its natural advantages, Southeast Asia could aspire to further ...

The rising adoption of solar PV technology drives the global trade of relevant products. While China remains the dominant player, ASEAN has emerged as a major exporter ...

As of the first quarter of 2024, the total capacity of photovoltaic modules in Southeast Asia reached 93.2GW,

ASEAN photovoltaic cell modules

with cell capacity at 69.6GW, wafer capacity at 34.2GW, ...

U.S. trade officials announced on Friday a new round of tariffs on solar panel imports from four Southeast Asian nations after American ...

Since module manufacturers in the four countries can avoid duties by using cells from outside of the four regions, while module capacity is sufficient in the U.S. and globally, the ...

Coalition trade lawyer says the U.S. Department of Commerce's final tariffs on solar cells and modules from Cambodia, Malaysia, Thailand and ...

It covers manufacturers of PV modules, cells, wafers, ingots, polysilicon, and metallurgical-grade silicon. The map includes factories in Cambodia, Indonesia, Malaysia, ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

The U.S. Department of Commerce announced Tuesday that it has made a preliminary affirmative determination in a countervailing duty investigation into solar cell ...

Commerce announced its final affirmative determinations in the antidumping duty and countervailing duty investigations of crystalline photovoltaic cells.
