

According to the Albanian Telegraphic Agency (ATA), the four proposed projects include a 49.96 MW facility in the Finiq municipality in southern Albania, submitted by Greensol.

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A proposed unit in Fier, the ...

The Ministry of Infrastructure and Energy of Albania received four applications for solar power projects with a combined capacity of 235 MW. A ...

Voltalia has commenced construction of the Spitalla photovoltaic power plant in Albania. Located in the Durrës region on the Adriatic coast, just 50 kilometers from Tirana, the ...

An application was accepted for a 50 MW solar power plant in Fier in Albania, the third such project in the same area that won't be subsidized.

The "Blue 1" photovoltaic park in Fier, with a capacity of 50 MW, has been fully operational since last May, as part of the government's initiatives to diversify ...

Albania's Ministry of Infrastructure and Energy has received expressions of interest from four companies looking to construct four solar projects with a cumulative capacity totaling ...

The two projects won 15-year contracts for difference (CfDs) at the first successful solar power auctions in Albania. Spitalla, of 100 MW in peak capacity, gets EUR 29.89 per ...

At 140 MW in peak capacity, Karavasta is the biggest photovoltaic system in the region. It is about to begin delivering electricity to the transmission system in Albania. The ...

Both sites are in Fier county. Albania has more than enough solar power projects in the pipeline to meet the 220.4 MW in the combined capacity of wind power and ...

The government of Albania is dealing with a tender plan to award 300 MW of solar projects under a bigger procurement programme envisaging to promote the release of 1 GW of solar power ...

1 day ago; The solar power plant on the roof of the Parliament of Montenegro in Podgorica has started producing electricity. The plant's total peak capacity is 81 kW, and it is expected to ...

Albania solar projects gain momentum as two major 148.5 MW ventures near approval. Discover how these

developments could reshape Albania's energy future--read on!

In addition, the selected location in central Albania will serve the purpose of geographical diversification of domestic power generation and de-congest the load of the transmission grid, ...

The Albanian government has given the green light to two projects put forward by local companies and envisaging the construction of solar photovoltaic (PV) parks with a ...

Albania's Ministry of Infrastructure and Energy has received four applications for solar projects with a total installed capacity of 235 MW. The projects are planned to be built in ...

On May 3rd, 2017 the EBRD (European Bank for Reconstruction and Development) and the Government, acting through the Albanian Ministry of Infrastructure and Energy ("MIE"), have ...

The project aims to address the vulnerability of Albania's hydro-dominated energy system, which is frequently affected by dry weather conditions.

A move toward more solar is partly an attempt to diversify Albania's electricity sources. In "Evaluation and integration of photovoltaic (PV) systems in Albanian energy landscape," which ...

The project, slated for completion in the second half of 2027, will contribute to Albania's energy transition by providing competitively priced electricity for both local and ...
