

Armenian Defense Communication Base Station

Does Armenia have a military base?

The military base is part of a joint air defense system of the Commonwealth of Independent States (CIS), which was deployed in Armenia in 1995. Furthermore, the Armenian Air Force relies partially upon the Russian MiG-29s located at the military base, for the defense of Armenia's airspace.

Are Armenian Defense acquisition organizations ready for Tech readiness?

Acquisition organizations are another critical cog in defense innovation management ecosystems--and the primary vehicle for tech readiness. The mechanics of the Armenian defense acquisition system remain understudied, hampered by a lack of transparency.

Should Armenia build a hyperscale data center?

Building a hyperscale data center in Armenia can have several obvious positive impacts on the local economy, particularly in the technology sector and other interconnected industries. It can also benefit research sectors. However, there are three geostrategic advantages that deserve closer scrutiny.

Will Armenia's defense technology portfolio occupy the post-war security agenda?

As the Armenian government reflects on wartime lessons and ponders reform, the defense technology portfolio is poised to occupy a prominent slot in the post-war security agenda. In recent years, Armenia has aimed to burnish its defense industrial posture--and underpinning institutions.

What happened to Russian military bases in Armenia?

Under a Russian-Georgian agreement signed in 2006, Moscow closed the bases headquartered in Batumi and the Armenian-populated town of Akhalkalaki by the end of 2008. Armenia regards Russian military presence as a key element of its national security.

How can Armenia maintain pace with its well-endowed adversaries?

To maintain pace with its well-endowed adversaries, Armenia must effectively tap and leverage its innovation capital, hence the purpose of the proposed organization. It would aim to link and channel nodes of ingenuity to address the innovation challenges facing the Armenian defense establishment.

Territorial Defense should allow for more substantial capacity without relying solely on the call-up of reservists, which proved to be a failure in 2020. How exactly should this ...
