

Battery Cabinet Operation Procedure Base Station

How to install a battery cabinet?

Check the battery cabinet placement against the construction drawing. Ensure there is maintenance space and a distance of more than 0.5 meters from heat sources. Follow the battery installation diagram and manual for installation. Wipe dust off battery terminals and check that each bolt is tightened before installing connection bars.

What is a base station power cabinet?

The base station power cabinet is a key equipment ensuring continuous power supply to base station devices, with LLVD (Load Low Voltage Disconnect) and BLVD (Battery Low Voltage Disconnect) being two important protection mechanisms in the power cabinet.

Where is the battery cabinet located?

The battery cabinet may be located to either the right or left of the UPS cabinet. The recommended location is to the right of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 21.

What are the steps in energy storage installation?

The main steps are: to build the foundation, install the energy storage cabinets, install the battery and inverter, and wire it all. During the commissioning of an energy storage system, which tests does the team perform? System-wide joint commissioning.

Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet as viewed from the front of the cabinet. See Figure 3 for line-up-and-match configuration views. Figure 3. Eaton 93PM 100 kW UPS and Two 93PM Integrated Battery Cabinets

Where is the UPS battery cabinet located?

The recommended location is to the right of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 21. If line-up-and-match installation, remove the rectangular knockout on the bottom front side of the UPS and the IBC (see Figure 15).
