

# Battery cabinet awning

How does a battery-powered RV awning work?

This battery-powered awning attaches to your RV and extends and retracts with the flip of a switch. It has the rain dump feature that releases pooled water automatically. The battery operation means no need to run wires into your RV and the rechargeable battery operates 22-25 times between charges. [view full answer...](#)

Which RV awning should I buy?

My suggestion is the Solera 18V Power RV Awning, 18' wide with a rechargeable battery in white fade, # LC730510 or in black fade, # LC729505. This battery-powered awning attaches to your RV and extends and retracts with the flip of a switch. It has the rain dump feature that releases pooled water automatically.

Why should you buy a battery-powered awning?

Ideal for dry camping - or if you just don't want to deal with wiring - this battery-powered awning extends with the flip of a switch to shield you from the sun. Relax in the rain too - awning automatically dumps pooled water to prevent damage.

What if a patio awning runs out of battery?

If you end up running out of battery before the patio party is over, you can always use your power drill (not included) to pull the awning back in thanks to the manual override. One thing that can quickly ruin your camping trip is a broken awning. It's not easy or cheap to replace, and you can't really enjoy your patio without one.

How many times can a awning be charged?

You can extend and retract the awning 20 to 25 times on a single charge. Once the battery is drained, the included charge kit plugs into any 110V wall socket and connects to the battery pack built into the arm - don't worry, you won't need to remove the battery pack to charge it. It can take about 48 hours for it to fully charge again.

Do I need a wiring for my awning?

Because this awning is powered by the self-contained, rechargeable battery, no wiring is required. California residents: [click here](#) This product can expose you to chemicals including di- (2-ethylhexyl)phthalate (DEHP), which is known to the State of California to cause cancer.
