

# Can a 24V DC generator be connected to an inverter

Can I add an inverter to a generator?

Check out our editorial guidelines to learn more. Yes, you can add an inverter to a generator if you find an inverter with enough capacity and follow the safety guidelines. However, in practice, it will be hard to find a compatible inverter that can make the most of all the power that portable generators offer.

Do I need a 24V / 12V converter?

You might have an inverter that is powered by a 24V battery but the inverter is outputting 110V AC (or maybe 230V AC depending on where you live). If you have a 12V device it is most likely DC. If you do have a 24V electrical system and you need to use 12V items such as LED lights or fans, etc. then you need a 24V->12V DC-DC converter.

Can you plug a DC device into an inverter?

An inverter is for plugging in AC devices. You would never plug a DC device into an inverter. You might have an inverter that is powered by a 24V battery but the inverter is outputting 110V AC (or maybe 230V AC depending on where you live). If you have a 12V device it is most likely DC.

Should you buy an inverter generator?

However, in practice, it will be hard to find a compatible inverter that can make the most of all the power that portable generators offer. In turn, you generally want to invest in an inverter generator if you plan to power any sensitive electronics.

What is a generator inverter?

An inverter is a device that converts direct current (DC) to alternating current (AC); This allows you to use your generator for more than a few hours. When you do so, you'll be able to attain longer run time and more power. Generators are great for emergencies, but they need to produce stable power.

Do inverters need a DC outlet?

However, in practice, many of the inverters on the market need DC power input. And even if your generator has an outlet with this type of power, you may need an adapter to connect it to the inverter. After all this work, you will likely still find the capacity of the small DC outlet of your generator lacking.
