

# Capital container power generation

What is a 40 ft containerized generator set?

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up to 34% space utilization savings over traditional build designs.

What size generator container do I Need?

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ambient conditions. Customized sizes to accommodate special project requirements are available on request.

Who is Capital Power?

Capital Power is a growth-oriented North American power producer headquartered in Edmonton, Alberta. The company develops, acquires, owns, and operates power generation facilities using a variety of energy sources. We are a growth-oriented North American power producer, publicly traded (TSX: CPX), and headquartered in Edmonton, Alberta.

Are containerized generators reliable?

Years of use in the rental, oil and gas, mining and other heavy-duty industries have tested the reliability, usability and durability of our containerized generators. Our primary design challenges in developing this line of containerized generators were usability, reliability and functionality for the end user.

What is a type 6 generator container?

Our Type 6 generator containers consist of two or three pre-assembled modules, depending on the engine type and the application. The overall package (gas engine, container, and auxiliary components) is available for 65, 70, 75 and 80 dB (A) in 10m (surface sound pressure level according to DIN 45635).

How much power does Capital Power own?

Currently, we own approximately 12 GW of power generation capacity at 32 facilities. EDMONTON, Alberta - Capital Power Corporation (TSX: CPX) today released financial results for the quarter ended June 30, 2025.

Using Shipping Containers for Energy Industry Shipping containers have become increasingly popular in the power generation and energy industry due to their ...

Our containerised solutions are designed to provide optimal performance across various site conditions, ensuring excellent reliability for all your power generation needs. By maintaining ...

Containerized energy storage seamlessly integrates with solar and wind power projects, addressing the intermittent nature of renewable energy sources. This integration ...

# Capital container power generation

Our generator containers for Type 2, 3, and 4 gas engines have a standard 40-foot length. Width and height depend on engine type, the application (power generation only or CHP) and ...

Capital Cost and Performance Characteristic Estimates for Utility Scale Electric Power Generating Technologies To accurately reflect the changing cost of new electric power generators for ...

our eco&#176; GEN-C series features all-in-one packaged power generation solution, engineered for mobility, easy deployment and scalability. each power container is engineered to meet specific ...

Midland Cogeneration Venture (MCV) is the largest natural gas-fired combined electrical energy and steam energy generating plant in the United States of America. The facility is a major ...

These systems integrate a diesel or gas-powered generator within a specially designed shipping container, creating a self-contained power generation unit that can be easily transported and ...

In April, Capital Power Corporation, based in Edmonton (Alberta), Canada, a power producer with approximately 10 gigawatts (GW) of power generation at 30 facilities across ...

Originally launched for limited markets in 2021, the 40-ft containerized generator sets were engineered for easy transportation, simple installation and are stackable, offering up ...

A containerized genset is a diesel or gas-powered generator that is housed within a specially designed ISO shipping container. This format offers a portable, weatherproof, and secure ...

Harquahala is a 1,092 MW combined cycle gas-generation facility located in Maricopa County, Arizona. In 2024, Capital Power acquired a 50% ownership interest in the facility, with the ...

What Is a Mobile Solar Container? A mobile solar container is simply a portable, self-contained solar power system built inside a standard shipping container. These types of ...

MOBISMART is the leading provider of advanced, mobile, solar off-grid power generation and storage systems that can be easily deployed to construction ...

Each manufactured containerised generator is acoustically lined to achieve the external sound levels required at your site. We build each container from scratch with special louvres for free ...

At the beginning of the Tier 4 transition, our engineering team had the opportunity to work with different customers in different markets to design and develop a line of high-power Tier 4 Final ...

1 day ago&#0183; Justin DeAngelis, Global Head of Sustainable Infrastructure at Denham Capital,

# Capital container power generation

commented, &quot;Data centers have created an unprecedented and immediate demand for power ...

Capital Industries is the premier container manufacturer in the Northwest. Beyond standard front and rear load containers our product line includes special application models such as ...
