Can a charging pile be used with a 220V power supply?

The AC charging pile can be used when it is connected to a 220V power supply. The maximum charging power of the AC charging pile is 7KW, the charging power of the DC charging pile is generally 60KW to 80KW, and the input current of a single gun can reach 150A--200A, which is a huge test for the power supply line.

How much does a charging pile cost?

The price of charging piles varies greatly, ranging from hundreds to thousands of RMB, causing the price difference. The most important thing is the difference in power. The price of 11KW is about 3000 or more, the price of 7KW is 1500-2500, and 3.5 The portable price of KW is under 1500.

What is the difference between AC and DC charging pile?

AC charging pile: Often called slow charging pile, charging time is longer (usually takes 6-10 hours). Suitable for home and public parking lots, with low power, usually connected to 220V power supply. Suitable for small passenger electric vehicles. DC charging pile: Called fast charging pile, charging time is short (usually 30 minutes to 2 hours).
