How many megawatts is a rooftop solar project in Chile?

Currently, several utility-scale solar projects are in various stages of development across different regions in Chile. The government has implemented several favorable regulations to encourage investment in rooftop solar installations, which currently stand at 167 Megawatts.

What are the different types of solar inverters?

There are mainly three types of solar inverters -- string inverters, micro-inverters, and power optimizers. All these inverters have a different system. However, they have the same function, which is collecting DC power from batteries and convert into AC, though with different levels of efficiency.

How does a string inverter work?

In a solar PV system that comes with a string inverter, all the solar panels are connected together into "strings." When the panels generate energy, it all goes to a single inverter, which is generally placed in a residential building, in a garage, or in the basement.
