

Chile's 10 billion energy storage project Wulian

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects in Latin America with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:

How much battery storage capacity does Chile have?

According to data from Asera, the Chilean Renewable Energy Association, there are only 64 MW of battery storage capacity currently active, representing 0.2% of national capacity. AES Andes, a subsidiary of U.S. company AES Corp. operates all 64 MW at their Angamos and Los Andes substations.

Where are Chile's battery energy storage facilities located?

Chile's first battery energy storage projects were commissioned in 2009, and all but two of its 16 administrative regions have facilities in operation, under construction or in the planning stage. The greatest installed capacity is found in the northern regions of Antofagasta and Tarapacá, the country's solar powerhouses.

Is lithium ion battery storage available in Chile?

While many projects are under development, lithium-ion battery storage is still limited. According to data from Asera, the Chilean Renewable Energy Association, there are only 64 MW of battery storage capacity currently active, representing 0.2% of national capacity.

Will Chile support the energy transition?

A spokesperson for Engie Group told Dialogue Earth that Chile is seen as one of its strategic countries for supporting the energy transition, which "entails the investment of USD 1.8 billion by 2027. Our plan in Chile considers incorporating 1.4 GW to reach 2 GW of installed capacity in clean energy, including 2 GWh in storage systems".

Why is Chile pursuing energy storage in Antofagasta?

Chilean president Gabriel Boric (centre) at the inauguration of an energy storage plant in the northern region of Antofagasta in April 2024. Chile has strong conditions for wind and solar energy, and is pursuing storage to help overcome intermittent supply (Image: Ximena Navarro / Dirección de Prensa, Presidencia de la República de Chile)

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline of projects on the way, Chile's ...

Having launched a national storage strategy in 2023 that sets targets and aims to attract investment in the sector, and with a large pipeline ...

Chile's 10 billion energy storage project Wulian

The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO₂, ...

The bill includes "congestion rent", which aims to insure generators against short- and long-term issues like the eviction of regulated contracts and market concentration. In ...

The balancing services provided by the Arena BESS project will decrease CO₂ emissions and enable further integration of large-scale solar energy projects into the Chilean ...

"To achieve this, this year we will launch a bill that requires energy storage systems at large scale which will start operations in 2026. It will be the ...

Chile has attracted a cumulative \$14.8 billion in investment in large-scale renewable power projects since the start of 2010, with the country being one of the hottest clean energy markets ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022. ...

Why Chile's Energy Market is Ripe for Storage Solutions a country where the Atacama Desert's solar potential could power entire continents, yet energy storage remains the missing puzzle ...

Chile is set to challenge the U.S. as the leader in the energy storage market, banking on its vast lithium reserves and new investments. The global ...

Data That Packs a Punch Chile aims for 70% renewable energy by 2030 --storage is the missing puzzle piece. The 2023 tender awarded contracts for 777 GWh of ...

If you're in the energy storage game, Chile's 2025 tender announcement is like spotting a rare bird in the Atacama Desert--exciting and packed with potential. With a \$33 ...

A coalition of companies has committed to a \$100 billion investment in grid battery storage, a move that promises to reshape the energy landscape. This initiative is spearheaded by the ...

Chile opens land bidding for 13.2 GWh of energy storage projects The grid operator has determined the maximum storage capacity at each of the six substations which the bidders ...

The technological diversity of energy storage projects in Chile is remarkable. From battery storage systems to innovative projects with gases such as CO₂, the country is exploring different ...

Chile's 10 billion energy storage project Wulian

A new initiative by the Chilean Ministry of Energy and the Ministry of National Assets is expected to cover storage projects with an aggregate ...

China Energy Transition Review 2025 China's surge in renewables and whole-economy electrification is rapidly reshaping energy choices for the rest of the world, creating the ...

As of the end of 2022, the total installed capacity of energy storage projects in China reached 59.4 gigawatts, with pumped storage taking up to 77.6 percent and new energy storage accounting ...

"To achieve this, this year we will launch a bill that requires energy storage systems at large scale which will start operations in 2026. It will be the largest such project in Latin ...

The Chilean government has approved a resolution to allocate public land for energy storage projects that will start operations in 2026.

Chile is set to challenge the U.S. as the leader in the energy storage market, banking on its vast lithium reserves and new investments. The global energy storage industry ...

Through the deployment of cutting edge battery storage technology, Fluence is not only addressing the technical challenges of Chile's energy transition but also contributing to the ...
