

Columbia Energy Storage Equipment Box Company

What is the Columbia Energy Storage Project?

The Columbia Energy Storage Project will feature Energy Dome's standard-frame 20MW/200MWh CO₂ Battery, powering around 18,000 homes in Wisconsin for 10 hours on a single charge. It aims to set a benchmark for other utilities and energy providers seeking to boost their storage solutions and cut carbon emissions.

What is Alliant Energy's Columbia Energy Storage Project?

Alliant Energy's revolutionary Columbia Energy Storage Project, using Energy Dome's safe, reliable CO₂ battery, represents a significant advancement in energy storage while bolstering the power grid to benefit Wisconsin customers.

How do energy storage systems work?

Then, when the stored energy is needed, the system converts the liquid CO₂ back to a gas, which powers a turbine to create electricity. The energy storage system will be built south of Portage, Wisconsin in the town of Pacific and near Alliant Energy's existing Columbia Energy Center.

Where will a new energy storage system be built?

The energy storage system will be built south of Portage, Wisconsin in the town of Pacific and near Alliant Energy's existing Columbia Energy Center. Construction is expected to begin in 2026 and be completed by the end of 2027.

The energy storage system will be built south of Portage, Wisconsin in the town of Pacific and near Alliant Energy's existing Columbia Energy Center. Construction is expected to ...
