

How many GNET stations are there in Greenland?

The 65 GNET stations are located along the coastline of Greenland. The stations can be split up into three categories. "Remote sites" - Located in the open land where power and communication are limited or absent. These sites are therefore powered with solar panels and batteries. "Town sites" - Located in or near towns and settlements.

Where is the Nuuk ground station located?

The Nuuk Ground Station, strategically located in Greenland, offers significant advantages for receiving satellite data from satellites in polar orbit. Due to Nuuk's unique geographical position close to the Arctic Circle, it provides optimal coverage for polar orbiting satellites.

Why is Nuuk a good ground station?

Due to Nuuk's unique geographical position close to the Arctic Circle, it provides optimal coverage for polar orbiting satellites. This geographic advantage ensures that the ground station can maintain consistent and high-quality communication with satellites as they traverse the polar regions.

What is Greenland GNSS network (GNET)?

GNET, Greenland GNSS Network, is a global reference frame for geodesy and geophysics. GNET provides data with multiple purposes and possibilities including: Precision navigation, Climate research, Meteorology, Space weather. GNET is the fundamental geodetic infrastructure in Greenland and will serve as reference for future networks on a global scale.
