

Comoros Communication Network 5G Base Station Upgrade Project

How did the Comoros project address telecoms?

The Comoros project addressed telecoms from several angles. The World Bank and IFC advised the government on liberalizing the sector, including by supporting development of the 2014 Communications Act.

Why is Comoros better than other countries?

Through competition, Comoros now has better quality and cheaper telecoms services, as well as broader coverage. In a country with scarce government resources, the World Bank's \$32 million has made a substantial contribution by leveraging over \$90 million in telecoms licensing fees and infrastructure investment.

Development Challenge

Does Comoros have a telecom monopoly?

In 2013, Comoros was one of the few countries worldwide with a telecoms monopoly. The state-owned enterprise, Comores Télécoms, charged customers a high price but provided poor services. Consequently, only 40 percent of the country's 800,000 people had mobile service, and less than 1 percent had broadband internet.

Did Comoros get a second telecom license?

Instead, in 2015, with World Bank support, the Comoros' telecoms regulator (ANRTIC) held an international tender for a second telecoms license. This attracted African bidders Telecom Malagasy S.A. and Mauritius Telecom, and international firms, including France's SFR.

What did the Union of the Comoros do?

The Union of the Comoros, an archipelago off Africa's east coast with high levels of poverty, sought to improve communications, trade, and economic opportunities by expanding mobile communications and internet services.

With the advent of the 5G era, mobile users have higher requirements for network performance, and the expansion of network coverage has become an inevitable trend. Deploying micro base ...

Access to the Internet, new information, and communication technologies are becoming necessary in human life. However, for people in rural and remote areas, connectivity ...

For many years, Comoros' insular landscape led to island gaps in connectivity, with limited inter-island links and reliance on expensive satellite ...

The Corporation collaborates with the four mobile network service operators in Hong Kong for the upgrade of the 5G network and a contract for a new commercial system was awarded to ...

Comoros Communication Network 5G Base Station Upgrade Project

To expedite the deployment of telecom infrastructure, enhance inter-island connectivity, and improve network quality, the IFC will provide Yas Comoros with a EUR25 million ...

Kyocera will showcase its 5G virtualized base station at Mobile World Congress 2025 (MWC), the world's largest communications technology convention, in Barcelona, Spain, ...
