

# Cost of mobile power storage vehicles in Costa Rica

Can electric cars make transport more sustainable in Costa Rica?

President Carlos Alvarado Quesada sees electric cars as key to making transport more sustainable in Costa Rica. The National Decarbonisation Plan has big goals for electric vehicles. It wants 70% of buses to be electric by 2035 and 100% by 2050. For light vehicles, the goal is 60% zero-emission by 2050, with 25% electric by 2035.

What is Costa Rica planning for electric cars?

Costa Rica is planning big for electric vehicles. They want to build a strong system for electric cars. This includes making more charging stations and improving the ones we have. The government wants to make it easier to use electric cars. They plan to add more charging spots and update old ones.

How much does an EV cost in Costa Rica?

As of now, there are 11 electric vehicle models priced under \$25,000 in Costa Rica--compared to just six in neighboring Colombia. The Geometry E, in particular, ignited a price war that pushed Costa Rica's EV market to new heights. This model is now \$2,000 cheaper than when it was first introduced, a significant factor in the market's growth.

Are electric cars becoming more popular in Costa Rica?

Electric vehicle adoption in Costa Rica is growing fast. By 2023, the number of electric cars on the road jumped by 300% from the year before. Over 5,000 electric vehicles were registered in 2022, showing a big move towards green transport. The country's focus on renewable energy is key to this shift.

How many EV chargers are there in Costa Rica?

By March 2024, Costa Rica had 57 fast chargers for electric cars. This is up from 50 in 2022. They plan to add more, aiming for 80 to 90 stations soon. Most of these stations are public L2 chargers. They are free and can charge most EVs in 4 to 5 hours. Also, EV sales have doubled in recent years.
