

EU energy storage plans

Will the European Commission introduce an energy storage package in 2025?

The European Commission says it will introduce an energy storage package in 2025, as outlined in a new report on progress by member states toward 2030 clean energy targets. From ESS News

Should the European Commission adopt an energy storage action plan?

The European Commission must adopt an Energy Storage Action Plan within a broader Flexibility Package, to harmonise markets, remove regulatory barriers, and ensure storage is integral to national energy strategies.

Why is European energy storage important?

This is particularly important in the context of EU energy security and the transition away from fossil fuels for both environmental and geopolitical reasons. To help track this growing industry, the European Union has created a comprehensive database of the European energy storage technologies and facilities.

What is the European energy storage inventory?

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

What is the European Association for storage of Energy (EASE)?

The European Association for Storage of Energy (EASE) shares key overviews on the recent publication (28 May 2025) of the European Commission's assessment of the Member States' latest National Energy and Climate Plans. Most Member States' NECPs reference the importance of flexibility and energy storage.

The aim of the European Energy Storage Inventory is to record all European energy storage projects by status - in operation, planned and under construction -, by location and by ...
