

Energy storage equipment in Northern Cyprus and cooperation

How many energy storage applications have been approved in Cyprus?

The Cyprus Energy Regulatory Authority (CERA) representatives reported establishing a regulatory framework for energy storage in 2019, followed by market rules approval in 2021. The Cyprus Transmission System Operator has received 13 storage applications totaling 224 megawatts capacity, with eight applications processed and five under review.

Why does Cyprus waste so much energy?

AKEL MP Costas Costa characterised Cyprus as "the only country in the world where thousands of megawatt-hours go unused due to lack of centralised green energy storage systems," adding: "During the day we waste megawatt-hours because we lack storage, and at night we are one step away from blackouts."

When will commercial energy storage systems be fully installed & connected?

All systems must be fully installed and connected to the grid by June 2026. Although TSOC retains ownership and operational control, CERA has stipulated that private storage operators will receive priority for grid services, preserving space in the market for commercial energy storage initiatives.

Cyprus has set out a policy framework for the integration of energy storage systems after reaching a funding agreement with the European Commission (EC). The Mediterranean island's ...

Acknowledgement The present study performed in the framework of "Storage & Renewables Electrifying Cyprus" project (SREC, INTEGRATED/0916/0074). SREC project is co-financed ...

Cyprus will establish its first large-scale electricity storage infrastructure within the next 16 months, Energy Minister George Papanastasiou announced at the Green Agenda ...

For years, Northern Cyprus has danced this frustrating tango with unreliable energy grids. But here's the twist: The region is now leading a power storage revolution that's turning blackouts ...
