Can a generator be used as a power substitute in Ghana?

Generators, solar panels, and other small-scale power supplies, such as flashlights, can be used as power substitutes in Ghana. However, substitutes have low bargaining leverage because predominantly, power from the government is relatively cheaper than most forms of alternative power supply.

How much does electricity cost in Ghana?

The price of electricity currently stands at US\$0.106/KWh. Consumer bargaining power is also low in Ghana; prices are determined by the government with little input from the public. Consumers do not have the option of transferring from one electricity distribution company to another because there are no other options.

How will GPGC power the new power plant in Ghana?

GPGC will power the new power plant in Ghana using advanced upgraded power plants transported from Italy. These power plants will utilize General Electric Sprint Gas Turbines (LM6000PD and LM6000PF). Both turbines have recently been fully serviced by General Electric. Together, they will provide a total of 107mw additional capacity into Ghana's power grid.

How much power will General Electric provide to Ghana's power grid?

General Electric's recently serviced plants will add a total of 107mw into Ghana's power grid.
