

Greek energy storage battery exports

Can a battery storage plant be built in Greece?

An increasing number of local and foreign companies are interested in building energy storage facilities in sun-loving Greece using battery technology. In fact, the Regulatory Authority for Energy (RAE) has been receiving applications for permits concerning battery storage plants.

Will Greece get 700 MW of battery storage capacity?

Early last summer, the government announced an ambitious plan to issue a bid for 700 MW of battery storage capacity this Autumn. The plan is part of an energy storage policy framework aimed at strengthening Greece's energy storage sector, which is currently underdeveloped.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

What is Greece's battery storage target?

The 1,000 MW battery storage target was set in 2021 as part of Greece's National Recovery and Resilience Plan. This plan was initially introduced in response to the COVID-19 pandemic but shifted focus to support Greece's green energy transition.

How much battery storage will Greece have in 2024?

By the end of 2024, Greece's third battery storage auction will offer 200 MW of standalone battery projects, bringing the total capacity from all three auctions to 900 MW, inching closer to the initial goal of 1,000 MW. The 1,000 MW battery storage target was set in 2021 as part of Greece's National Recovery and Resilience Plan.

Does Greece have a zero-subsidy battery system?

The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions.
