How to convert 12V DC to 220V AC?

Make a full sinusoidal 1000 watts inverter using EGS002 SPWM driver board, which can convert the 12V DC to 220V AC with 50/60Hz pure sine wave.

How much does a pure sine wave inverter cost?

Decent high power commercial pure sine wave inverters are very expensive! They range from \$120-\$400. With the EGS002 you can design all sorts of inverters with input voltage, output voltage and power ratings of your choice! For as low as \$20, depending on your specs and where you source your components.

How many kW can a DIY inverter board handle?

The DIY inverter board can handle up to 1kW (depending on the transformer size). Around \$30 was spent to build this project from locally sourced parts. Watch My Full YouTube Tutorial: Features Of This Project: Key Points: Powerplants use generators that generate a pure sinewave output. It's what you would find from the grid.

What is a 50Hz inverter?

Its purpose is to boost the input voltage and generate a 50Hz (default) pure sine wave output with high accuracy and minimal harmonic distortion. This is achieved with the assistance of an external 12MHz crystal oscillator. The output voltage of the inverter circuit can be adjusted to 220V AC using the trimmer (POT1).

Is egs002 a good inverter?

The EGS002 is a versatile \$3 all-in-one solution for building Pure Sine Wave inverters. You can build low power to high power inverter units out of it! Right out of the box, it is not an inverter just yet. You would have to build a few components around it to make it into a functional inverter unit. Why It Is So Good?

How much does a square wave inverter cost?

A few years back sine wave inverters were extremely expensive (\$200-\$1000). As a result square wave and modified square wave were the common and affordable options. Square wave inverters are less efficient and can damage sensitive appliances.

In this project, I will show you how to make a full sinusoidal inverter using EGS002 SPWM driver board, which can convert the 12V DC to 220V AC with 50/60Hz pure sine wave.
