What size inverter do I Need?

Inverters come in different sizes starting from as little as 125 watts. The typical inverter sizes used for residential and commercial applications are between 1 and 10kW with 3 and 5kW sizes being the most common. With such an array of options, how do you find the right size for you? An inverter works best when close to its capacity.

What are the different solar inverter sizes?

Solar generators range in size from small generators for short camping trips to large off-grid power systems for a boat or house. Consequently, inverter sizes vary greatly. During our research, we discovered that most inverters range in size from 300 watts up to over 3000 watts. In this article, we guide you through the different inverter sizes.

How to calculate inverter size?

Using the Inverter Size Calculator is quick and easy. You'll need three inputs: Total Wattage (W): This is the total power consumption of all the appliances or devices you plan to run through the inverter. Safety Factor: A multiplier to ensure some buffer above your actual power requirement. Typically ranges from 1.1 to 1.5.

How to size a 1500 watt power inverter?

A rule-of-thumb for sizing your 1500-watt power inverter is to combine the wattage of all the devices you are planning to use at the same time (don't forget basic necessities, like lights) and give yourself 20% headroom.

How much wattage should I add to my inverter?

If you are able to find the specific wattages for your devices, you'll want to add them together to get a bare minimum figure. This number will be the smallest inverter that could possibly suit your needs, so it's a good idea to add between 10 and 20 percent on top and then buy an inverter that size or larger.

How do I Choose an RV inverter?

Calculate the total wattage by adding up the running watts of all appliances. Take into consideration the surge requirements of appliances with electric motors. Choose an inverter size that's at least 20% larger than the total calculated wattage. Identify the largest power draws in your RV to accurately size the inverter for your specific needs.
