

How many independent energy storage power stations are there in Papua New Guinea

How many IPPs are there in Papua New Guinea?

There are only seven IPPs operating in the PNG economy with a combined installed capacity of 257.3 MW since the enactment of the Electricity Industry Policy (EIP) of 2011 which seeks to bring more private sector investment into the energy industry (Government of Papua New Guinea, 2011).

Who controls the energy sector in PNG?

The energy sector is under the control of the Department of Petroleum and Energy (DPE), through two main divisions: Petroleum Division (oil and gas) and Energy Division (electricity and renewables). PPL, PNG Power Limited, is the integrated state-owned power company.

Should Papua New Guinea implement broader power sector reforms?

Strong political will and strengthening of institutional arrangements are urgent. The small island economy of Papua New Guinea (PNG) is facing severe electricity shortages and is therefore turning to implementing broader power sector reforms as a vehicle to attract private capital and investments in electricity generation.

Who owns power in PNG?

PPL, the state-owned power utility, owns 440 MW of capacity, including 65% of hydro and geothermal. Oil Search and ExxonMobil dominate the oil and gas sector. PNG's power grid is fragmented and suffers from frequent outages. Oil and gas represent 64% of the power mix. Total energy consumption is predominantly made up of oil and biomass.

How is PNG Power regulated?

PNG Power was established under the Electricity Commission (Privatisation) Act of 2002. It is regulated under the Electricity (Amendment) Act. PNG Power's revenues are insufficient to fund the planned expansion of the country's energy infrastructure.

What is the power sector investment plan in PNG?

TRANSFORMER CAPACITY EXPANSION PLAN Most new power sector investment in PNG over the next 10 years is expected to be organized around projects identified in the LCPDP (generation and transmission investments on the POM and Ramu grids) and the NEROP (electrification nationwide).
