Will Huawei's new lithium-ion battery disrupt the booming solid-state battery sector?

This recent patent application, reported by CarNewsChina, signals Huawei's aim to disrupt the booming solid-state battery sector. The patent details a battery with an energy density of 400 to 500 Wh/kg, potentially tripling that of standard lithium-ion cells. Huawei's tech tackles a key challenge: electrochemical stability.

Why is Huawei pursuing solid-state battery research?

Huawei's engagement in solid-state battery research reflects a wider trend among Chinese technology and automotive companies. Although Huawei does not manufacture power batteries directly, its growing interest in upstream battery materials is notable.

How will solid-state battery technology impact China's eV and tech sectors?

China's EV and tech sectors are aggressively exploring solid-state battery technologies to reduce reliance on established battery suppliers such as CATL and BYD. Companies like Xiaomi, and Nio, depend on third-party battery manufacturers.

Does Huawei have a 3,000-kilometre range and 5-minute charging capacity?

While Huawei's assertions of a 3,000-kilometre range and five-minute charging have attracted significant attention, experts caution that such figures remain theoretical and would necessitate charging infrastructure that is currently not commercially available.

Does Huawei make power batteries?

While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials. Earlier in 2025, the company filed a separate patent on the synthesis of sulfide electrolytes -- a key material known for its high conductivity but also high cost, sometimes exceeding the price of gold.

The Uppsala Battery Energy Storage System is a 5,000kW energy storage project located in University town Uppsala, Uppsala, Sweden. The rated storage capacity of the ...

Huawei's residential PV+ESS solution, thanks to its strong technical capabilities, has become the preferred choice for 3.9 million households and 30,000 installers worldwide. ...

Sweden's largest electric vehicle (EV) truck charging park will be completed later this year with a 2MW battery energy storage system (BESS) and, approvals permitting, 500kW ...

Huawei's energy storage project is advancing significantly, with distinct milestones achieved in 2023, expanding its global influence in renewable energy solutions, increasing ...

# Huawei Sweden Energy Storage Vehicle Industry Project

Solarvest Holdings Bhd and Huawei Technologies (Malaysia) Sdn Bhd have announced a strategic collaboration to accelerate the advancement of Malaysia's digital power ...

Cell to Grid Safety Huawei's Smart String Grid-Forming ESS ensures robust protection through five layers of integrated safety design, from individual cells, ...

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of ...

A prime example is the efforts of Soltech Energy Sweden AB and Falkenklev Logistik AB in Sweden deploying Huawei Smart String #ESS solution, which helps to unlock the potential of ...

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra ...

[Munich, Germany, May 10, 2022] Huawei today announced all-new smart photovoltaic (PV) and energy storage solutions at Intersolar Europe 2022. The ...

Huawei has invested a staggering \$16 billion in energy storage projects, focusing predominantly on technological innovation and advancements in renewable energy integration, seeking to ...

The Red Sea Project, the world's largest micro-grid energy storage project (400 MW PV and 1.3 GWh ESS) in Saudi Arabia, uses FusionSolar's grid-forming solution to ...

Sweden developer Sustainable Energy Solutions Sweden (SENS) has signed a long-term land lease for a 15MW PV, 50MW battery storage project.

This project is central to enhancing energy storage solutions that aid in balancing supply and demand in real time, thus providing a robust framework for the integration of ...

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres ...

SHANGHAI, June 16, 2025 /PRNewswire/ -- Huawei Digital Power, in collaboration with SchneiTec, has successfully commissioned Cambodia's first-ever T&#220;V S&#220;D-certified grid ...

Sweden's largest electric vehicle (EV) truck charging park will be completed later this year with a 2MW battery energy storage system (BESS) ...

Huawei has intensified its push into advanced energy storage by filing a patent for a sulfide-based solid-state
