

Install an outdoor power supply for your home charging station

Can I install an outdoor charging station without a garage?

When installing an outdoor charging station, there's some criteria to consider. The gold standard to knowing if you can have a charging station for your electric car without a garage is whether your charger has a NEMA 4 rating.

Should you install a home charging station?

But getting to that easy EV living requires some hard (and potentially very expensive) work up front. Installing a home charging station, like so many home improvement projects, can be fraught with unexpected costs, ambiguous information, and flaky contractors. It doesn't have to be that way, though.

How much does it cost to install a 240 Volt charging station?

Most American homeowners will spend around \$1,150 to \$2,750 to purchase and install a 240-volt charging station. A good home charger costs \$350 to \$750 or so, while the typical installation runs between \$800 and \$2,000 according to Qmerit, a nationwide specialist in installing EV charging equipment.

Should you install an EV charging station at home?

Installing an electric vehicle (EV) charging station at home is one of the smartest investments you can make as an EV owner. Not only does it provide the ultimate convenience of charging your vehicle overnight, but it also offers significant cost savings compared to public charging stations and adds value to your property.

Can You charge an EV at home without a garage?

By using a NEMA 4-rated charger, and mitigating the weather and climate conditions at your home, you can benefit from charging your EV at home outdoors just like those who charge in a garage. If you want to know more about how to charge an electric car at home without a garage or our Level 2 chargers, contact us.

What is a 240 volt home charging station?

A Level 2 (240-volt) home charging station allows you to plug in a nearly depleted EV in the evening and wake up to a full battery the next morning. Once you've lived with this luxury, you'll never look at gas stations the same way. But getting to that easy EV living requires some hard (and potentially very expensive) work up front.
