

Install protection when installing lithium battery pack

How do I protect my battery pack?

After ensuring all your connections are secure and insulated: **Cover the Battery Pack:** Place the assembled battery pack inside the appropriate shrink wrap tubing. **Heat Application:** Use a heat gun or lighter to shrink the tubing around the battery pack. This will help secure the cells together and provide a protective outer layer.

What are the OSHA standards for lithium-ion batteries?

While there is not a specific OSHA standard for lithium-ion batteries, many of the OSHA general industry standards may apply, as well as the General Duty Clause (Section 5(a)(1) of the Occupational Safety and Health Act of 1970). These include, but are not limited to the following standards:

How to mount a battery pack to a wall?

It is recommended to mount the battery pack to a wall. Make sure to leave a space of at least 2.18 inches between the battery pack and the wall. 1. Fasten the screws through the mounting brackets into the holes of the battery pack on its both sides. 2. Secure the mounting brackets to the wall with screws. 3.

How do you protect a battery from a short circuit?

Wear Protective Clothing: Always wear insulated gloves and safety glasses. **Prevent Short Circuits:** Ensure all components are properly insulated. Keep conductive materials away from the workspace. **Proper Soldering Techniques:** Never solder directly onto a battery cell. Instead, solder onto nickel strips or designated terminals.

How should a fortress lithium battery be stored?

Do not expose battery to high temperatures. Fortress Lithium Batteries should be stored out of direct sunlight under the following temperature conditions. Systems should be put into storage at 60% SOC and checked monthly to ensure the system SOC does not fall below 20%. At 20% SOC the battery will self-discharge in approximately 2 months.

How do I install a shrink-wrapped battery pack?

Place in Hard or Soft Case: Install the shrink-wrapped battery pack into a hard case or a soft protective case, depending on your specific needs. **Secure the Case:** Ensure the case is well-ventilated for heat dissipation, especially if the battery pack is in use for extended periods.
