What is a 3 phase solar inverter?

A 3 phase solar inverter is a device that converts Direct Current (DC) electricity generated from solar panels to Alternate Current (AC) and distributes it across a three phase power supply. Typically, 3 phase inverters cost \$300 - \$500 more than a solar inverter of comparable quality.

Do I need a 3 phase inverter?

If you do have 3 phase power, you don't necessarily need a 3 phase inverter, a single phase inverter may do - though 3 phase inverters are typically recommended by electricians to reduce the risk of voltage rise. If you don't have 3 phase power, then you don't need a 3 phase inverter. When weighing up a 3 phase inverter, consider these points:
