Can a 5 kW inverter power a battery?

Yes, a 5 kW inverter capacity means you can't draw more than 5 kW out of either the battery or solar at one time, but most residents shouldn't need to. Hybrid inverters are not compatible with all batteries. You could argue that AC coupling has the same issue, but you're not going to purchase a battery inverter now for a battery down the track.

Is a 5 kW inverter worth it?

It could be that the system will spend such little time providing above 5 kW, once shading and losses are taken into account, that it's not worth the cost of getting the next-largest inverter.
