What is an SMA Sunny Island Inverter?

The SMA Sunny Island 4548-US and Sunny Island 6048-US inverters are based on proven off-grid technology and feature industry-leading power output. They have a maximum efficiency of 96 percent, ensuring peak production and reducing diesel usage in rural communities.

What is the power output of a sunny island inverter?

Sunny Island inverters have an industry leading power output, with the SMA Sunny Island 4548-US and Sunny Island 6048-US models capable of up to 36 kW for single phase systems and up to 110 kW for three phase systems.

What is the Sunny Island battery inverter?

A core component in the SMA off-grid system is the Sunny Island battery inverter. This automatically regulates the balance between generated and consumed energy. It possesses a battery, generator and load control for this purpose. It can thus stave off generation and load peaks at any time and ensure a continuous energy supply.

Can the sunny island be added to a grid-tie inverter?

The Sunny Island can be added to any existing grid-tied system for battery backup power during power outages. Normally, the grid-tie inverter will shut off during a power outage, leaving you without power.

Who makes small 12 volt pure sine wave power inverters?

Inverters R Us carries a wide variety of small 12 volt pure sine wave power inverters manufactured by Aims, COTTEK, Go Power!, KISAE, Power Bright, Samlex, TBS, Thor & Wagan. These power inverters are listed from smallest to largest dollar amount and vary in different specializations and features.

How does a grid-tie inverter work?

During a power outage, a normal grid-tie inverter will shut off, leaving you without power. However, with a Sunny Island system, the solar panels for your grid-tie inverter supply AC power to charge your battery bank. This allows you to have power even when the utility power is out.
