

Jordan solar power home purchase

What is the largest solar energy project in Jordan?

Located east of Amman, Baynounais the largest single solar energy project in Jordan. The project achieved commercial operation in 2020, and supplies the annual power needs of approximately 160,000 homes, displacing an estimated 360,000 tonnes of carbon dioxide each year.

How many solar PV projects are there in Jordan?

Jordan Electric Power Company (JEPCO): 591.44 MW (32,257 projects). Irbid Distribution Company (IDECO): 309.32 MW (28,588 projects). Electricity Distribution Company (EDCO): 181.10 MW (13,300 projects). The global decline in solar PV system prices fueled strong demand for installations during the first half of 2024.

How much does solar cost in Jordan?

The commercial sector faces higher grid fees of 13 JD (\$18.3 USD) per kWac/month, reducing the economic viability of installations. In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations.

What is the solar energy potential in Jordan?

The solar energy potential in Jordan is enormous as it lies within the solar belt of the world with average solar radiation between 4 and 8 KWh/m², which implies a potential of 1400-2300 GWh per year annually.

Is there a cap on solar PV projects in Jordan?

In September 2024, Jordan's Council of Ministers lifted the cap on solar PV project sizes, enabling large-scale installations. A notable example is a 50 MW solar power plant financed by Cairo Amman Bank and currently under construction.

How much electricity does Jordan use a year?

Developed as a Power Purchase Agreement (PPA) between Masdar and National Electric Power Company, Jordan's state electricity provider, this US\$260 million project generates 563.3 gigawatt-hours (GWh) of electricity each year, equivalent to 4 percent of the annual energy consumption of Jordan.

First Solar and Shams Ma'an Power Generation have signed a 20-year power purchase agreement (PPA) with National Electric Power (NEPCO) in Jordan for a planned 52.5 MWAC ...
