

Eolus has sold the greenfield-developed wind power project Pienava, totaling 147 MW, to Latvenergo, Latvia's state-owned energy company. Construction is expected to begin ...

In collaboration with the AS Augstsprieguma tīkls, a Latvian transmission system operator, construction will begin on the new substation near Padure in July.

This week, the construction of Latvia largest solar power plant so far is starting at Kalkune in Augsdaugava district, reports Latvian Radio

Latvia's renewable energy capacity has expanded significantly, led by the Daugava hydroelectric power stations as the main electricity source. In 2022, wind power capacity ...

Nuclear energy has been postponed for Latvia. According to the document "Energy Strategy until 2050," the construction of a domestic nuclear power plant is currently ...

Eduards Kraucs (1898--1977) was a renowned Latvian photographer and cinematographer who, between 1936 and 1940, documented the construction of the Kegums Hydro Power Plant on ...

The works include installation of solar panels with total capacity of 93.5 MW DC, 18 medium-voltage power stations, 232 combiner boxes, irradiance sensors, weather stations, ...

In February, the Kegums - Ieriki power line is switched on, starting electricity supply to customers in Vidzeme. The assembly of the Kegums HPP valve gates and the construction of the fish ...

Latvia has decided that it will be able to independently build a nuclear power plant on its territory. There's nothing complicated about it. This is stated in the report of the Latvian ...

The construction of all three synchronous condenser stations in Latvia is proceeding according to plan, and the first synchronous condenser ...

If the construction of the fourth Estonian-Latvian power connection is economically reasonable, EU funding will be applied for so that the construction cost would not affect the ...

The possible construction of a nuclear power plant on Latvian soil is only one of the scenarios proposed by the ministry to develop the nuclear energy industry. A second ...

Construction of solar power plant Kalkunes SES started in October 2023 and was completed in April 2024.

Plant is located right near Daugavapils, second largest city of Latvia, ...

Copenhagen, Denmark, 3 October, 2024 - European Energy is set to begin construction on the largest solar farm in Latvia to date. The solar farm will have a capacity of 148 MW once ...

Pumped hydro storage for intermittent renewable energy Fengning Pumped Storage Power Station in China has the highest capacity at 3600 MW and an annual generation of 3.424 ...

About On a landplot of 890 000 sq.m. was installed solar panels with a total capacity of 60 MW in the solar power plant, generating green energy for years. By implementing this renewable ...

Copenhagen, Denmark, 3 October, 2024 - European Energy is set to begin construction on the largest solar farm in Latvia to date. The solar farm will ...

The construction of all three synchronous condenser stations in Latvia is proceeding according to plan, and the first synchronous condenser produced for Latvia has ...

Bid for tender to Construction of battery energy storage system at JSC Latvenergo Riga Hydro Power Plant Construction of battery energy storage system by Joint-stock company ...

European renewable energy provider SUNOTEC has completed the purchase of SIA DSE Lazas Solar's solar and energy storage project in Latvia from Danish Sun Energy. This ...

A new solar power plant with a capacity of 10.6 MW will soon emerge in western Latvia! KNESS Baltic team, as the general contractor, has begun construction of a solar power ...

The drilling work was carried out continuously, working in 3 shifts. 437 m length of concrete dike 9 - 12 m height of the dikes 8 construction cranes 14 diesel locomotives 143 different types of ...
