

Liberia container charging rechargeable batteries

Can I ship lithium batteries by Ocean?

If you are shipping lithium batteries by ocean, you will need to make sure that you specify the correct UN numbers and Proper Shipping Names (PSNs), as established in the UN Recommendations on the Transport of Dangerous Goods, commonly known as the Orange Book.

Can I send Spare lithium batteries by air freight?

You cannot send loose spare lithium metal batteries by air freight. Sending lithium-ion batteries by air freight is similar to the rules you must follow when sending lithium batteries by sea freight. You can choose to send them inside their respective devices, or you can send them separately in a container with a hard case.

Can I ship batteries in a shared shipping container?

Similar guidelines apply no matter whether you're shipping batteries within Europe or Worldwide. The following regulations apply when you are relocating possessions, including batteries, in a shipping container. This also includes a shared shipping container - often referred to as groupage.

Do you need a shipping declaration for lithium-ion batteries?

Similar to UN3480, shipping lithium-ion batteries under UN3481 requires a Shipper's Declaration if the watt-hour limits are exceeded. If the amount of cells and batteries meets the specified criteria, the shipping process becomes more manageable without the need for extensive documentation.

Can you take a lithium ion battery overseas?

Most people relocating overseas can avoid all issues by simply not taking these batteries with them and buying new ones upon arrival. However, this easy way out is not afforded to those who want to transport the second main type of battery, a lithium-ion battery.

Are lithium batteries rechargeable?

Lithium metal batteries: These are typically non-rechargeable and used in devices like watches, calculators, and certain medical equipment. They contain metallic lithium, which reacts to produce electrical energy. Key characteristics include:
