

How many EV charging stations are there in Luxembourg?

Luxembourg has announced the results of its fifth call for proposals aimed at promoting investment in EV charging infrastructure. Twenty-five projects, submitted by 20 companies, have been selected for the installation of 273 new charging stations across the country.

Does Luxembourg need a new electricity infrastructure?

Luxembourg aims to cover over a third of 2030 electricity demand with renewables, mostly through variable renewable energy (VRE) from PV and wind generation. The share of VRE generation in imported electricity is also expected to increase significantly. Taken together, these factors will require substantial investment in electricity infrastructure.

Does Luxembourg offer a subsidy scheme for charging infrastructure?

In addition to this initiative, a separate subsidy scheme exists under Luxembourg's Recovery and Resilience Plan, approved by the European Commission in June 2021. Small and medium-sized enterprises (SMEs) can benefit from financial assistance for charging infrastructure.

How much does a charging station subsidy cost?

This includes subsidies of up to 50% for charging station costs and up to 60% for grid connection costs, capped at EUR60,000 for grid connection expenses and EUR40,000 for other deployment-related costs per company. Notably, this scheme will conclude in 2024, with applications due by 31 December 2024.

How can SMEs benefit from financial assistance for charging infrastructure?

Small and medium-sized enterprises (SMEs) can benefit from financial assistance for charging infrastructure. This includes subsidies of up to 50% for charging station costs and up to 60% for grid connection costs, capped at EUR60,000 for grid connection expenses and EUR40,000 for other deployment-related costs per company.
