Can the inverter work with a 12V battery system?

This inverter can ONLY work with 12V battery system. The inverter CAN NOT can in parallel Battery MUST BE connected first 1200 watt is continuous output power, peak power is 3600W Package included: Note: Different types of loads have different starting impulse currents.

What is a high transfer efficiency power inverter?

High transfer efficiency is above 90%, complete isolate surge interference of input & output's voltage and current, Impact resistance, super load capacity, built-in AVR stabilizer, continuous stable pure sine wave output. This Power inverter is able to charge the battery bank when AC power is connected to the inverter.

How do you use a generator in a power inverter?

Generator mode-- use unstable generator 120V to generate power, access the inverter AC input, through the inverter AVR regulator, automatic matching 50HZ/60HZ municipal frequency, output voltage regulator in the normal operating range. 5. Unattended Mode --- When the battery is low voltage, the inverter goes into standby state (Power saving state).

What protections does a 1200W pure sine wave inverter offer?

Protections: Battery low voltage alarm / Battery high voltage alarm / Over temperature protection / Over load protection / Short Circuit protection. 110%-120% of the output was maintained for 30s, then the output turned to bypass, more than 160% maintained the 300ms.
