

Grid-scale energy storage and the resilience that it provides will be critical in facilitating those renewable energy sources in the digitalised smart grids of the future.

Power generation across the Middle East and North Africa (Mena) has doubled in the past 15 years and it is rapidly changing in character. While oil and natural gas remain the dominant ...

Ten key regulatory, financial, and market policy action steps are suggested to achieve the objective of successfully integrating energy storage systems in the power markets in MENA ...

The Middle East Energy Conferences in Dubai is a pivotal gathering for global energy leaders and innovators to explore crucial themes shaping the future of the energy sector. This dynamic ...

Until recently, large-scale energy storage was barely a consideration in the Middle East, where fossil fuels have long dominated power generation. With renewable energy ...

Saudi Arabia will become the main force in energy storage construction in the Middle East. At present, SunGrow, Huawei, BYD, and SmartPropel Energy have won bids for ...

The energy sector is an ever-evolving industry. Energy systems around the world are constantly transitioning and that brings about shifts in regulations, investor ...

Within the next 25 years, the Middle East and North Africa will be a global leader in renewable energy production and a hub for international renewable energy supply chains. ...

As the Middle East intensifies its shift to renewable energy, battery storage is becoming a vital part of its infrastructure. Countries like Saudi Arabia and the United Arab ...

Middle East oil producers are looking beyond their dependence on fossil fuels to sustain an energy future With an abundance of low-cost hydrocarbons, spending on energy sup-ply ...

The Middle East has long been relying on oil and gas -- not just in terms of revenues but also in power generation. But in the past years, the ...

MIDDLE EAST AND NORTH AFRICA STATUS/CHARACTERISTICS AND NEEDS: Regional analysis covers major oil and gas exporters as well as net importers, spanning the Gulf States, ...

The Middle East energy transition is accelerating, with renewables projected to account for 14% of power generation by 2035. While fossil fuels remain dominant, investments ...

Explore 10 renewable energy projects in the Middle East, showcasing solar, wind, and battery storage advancements set for 2025. [Read more here.](#)

The Middle East Energy fair is the international meeting point for all professionals in the electrical and energy sector in the Middle East. The fair covers the entire energy sector ...

The report includes scenario analyses for Saudi Arabia, UAE, Israel, and South Africa and a broader overview of trends across the rest of the MEA region.

The energy storage market in Oman and Kuwait, including batteries, is expected to grow in the coming years due to the increasing demand for renewable energy and the need for backup ...

Estimates for Germany, which has less year-round sunlight, indicate that this type of power generation from solar and wind sources will lead to storage facilities becoming indispensable ...

MENA countries are currently home to nearly 15% of the world's installed energy storage capacity, but this total will need to grow to enable variable renewable energy systems ...

22 hours ago; The Middle East distributed energy generation market size was estimated at USD 44.00 billion in 2024 and is projected to reach USD 99.71 billion by 2033, growing at a CAGR ...
