Will big Hollow Energy Center be Ameren's first large-scale battery facility?

The Big Hollow Energy Center will be Ameren's first large-scale battery facility, but the utility's long-range plans call for installing 1.8 GW of energy storage by 2042. A rendering of Ameren Missouri's proposed Big Hollow Energy Center, which the utility says could come online in Jefferson County by 2028. Courtesy of Ameren Missouri

What is the Big Hollow Energy Center?

The application involves the construction of an 800-megawatt (MW) simple-cycle natural gas generation plant, in addition to Ameren Missouri's first large-scale battery storage facility at one location. Known as the Big Hollow Energy Center, the new facility is designed to efficiently meet increased energy demands while ensuring grid resiliency.

Does Ameren Missouri have a smart energy plan?

"Building off the success of bringing in nearly two dozen new economic development projects in 2024, Ameren Missouri has construction agreements with potential large load customers for new energy demand," the utility said. Ameren also filed an updated Smart Energy Plan with the Missouri Public Service Commission in February.

What is Ameren Missouri doing to improve energy reliability?

ST. LOUIS, June 27, 2025 /PRNewswire/-- Ameren Missouri, a subsidiary of Ameren Corporation (NYSE: AEE), is taking the next step in its generation investment plan to enhance energy reliability for customers by filing an application with the Missouri Public Service Commission that includes a first-of-its-kind project for the company.

Pumped storage hydropower (PSH) is a type of hydroelectric energy storage. It is a configuration of two water reservoirs at different elevations that can generate power as water moves down ...

A large energy storage power station is a facility designed to store significant quantities of energy for later use, enhancing the reliability, resilience, and efficiency of modern ...

The plant features 12 reversible pump-turbine units, each with a capacity of 300 MW, including two variable-speed units, bringing the total ...

City Utilities is looking to expand its electric generation and battery storage by moving forward with financing up to \$280 million for two projects.

Ameren Missouri's ability to earn and utilize or transfer federal production and investment tax credits related
