

Namibia base station power system construction

What is Namibia's New Power Station?

Never miss a beat on tech, startups, and business news from across Africa with the best of journalism. Namibia's state-owned utility, NamPower, has completed the 54-megawatt (MW) Anixas II Power Station, set to be inaugurated on February 21 in Walvis Bay to enhance the country's electricity supply.

Will NamPower build anixas II power station?

NamPower has completed the construction of the N\$1.28 billion Anixas II Power Station, a 54 megawatts (MW) facility aimed at strengthening Namibia's electricity supply. The inauguration of the Anixas II Power Station is scheduled for 21 February in Walvis Bay.

What's happening at Namibia's anixas II power station?

Every day, we handpick the biggest stories, skip the noise, and bring you a fun digest you can trust. Namibia's state-owned utility, NamPower, has completed the 54-megawatt (MW) Anixas II Power Station, set to be inaugurated on February 21 in Walvis Bay to enhance the country's electricity supply.

When did NamPower start construction of Walvis Bay?

NamPower began construction of the station in Walvis Bay after signing an engineering, procurement, and construction (EPC) contract with FK Namibia joint venture (JV) in March 2022.

Why is NamPower launching a new power station?

NamPower stated that the new facility aims to provide reliable and dispatchable electricity to the national grid, supporting the country's energy needs and improving security of supply. The station is also expected to assist in managing the variability of renewable energy sources by providing backup generation when needed.

Why does Namibia invest in domestic power generation infrastructure?

By investing in domestic power generation infrastructure, Namibia aims to create a more resilient energy system capable of supporting economic growth and improving the quality of life for its citizens. Never miss a beat on tech, startups, and business news from across Africa with the best of journalism.
