How will New Zealand benefit from 5G?

Thanks to the government's work program, more New Zealanders will be better served by 5G connections, ensuring access to the same quality of mobile services as those in New Zealand's more populated areas. For more information, see the government's press release. 10.

What spectrum is needed for 5G in New Zealand?

3.3 GHz band use in New Zealand 5G needs spectrum across low, mid and high spectrum bands to deliver widespread coverage and support a wide range of use cases. Following the mid band spectrum planning in 2019, RSM is now planning the high band spectrum (26 GHz and 28 GHz) for 5G.

Does New Zealand have a 5G network?

The details of this agreement include: New Zealand's 3 mobile network operators (MNOs) each receiving 80 MHz of spectrum in the 3.5GHz band. This is sufficient radio spectrum for all three MNOs to operate nation-wide 5G networks.

Which GHz band will be allocated for National 5G networks?

The 3.5 GHz band will be allocated for national 5G networks. It is proposed that the 3.3-3.4 GHz band is allocated for broadband services by way of long-term, regional or local rights. RSM consulted on this proposal in August 2021. Its discussion paper described regional broadband and private networks as possible uses for the 3.3 GHz band.
