

New Zealand Telecom Base Station Company

What is the New Zealand telecommunications industry?

New Zealand Telecoms Industry Report at a Glance The New Zealand telecommunications industry is a stable mobile market with 3 network operators, a nationwide full-fibre wholesale broadband network and the overall market underpinned by strong economic fundamentals. Key developments covered in the New Zealand Telecoms Industry Report:

What does Telecom Corporation of New Zealand do?

Telecom Corporation of New Zealand Limited is that country's dominant telecommunications company, providing fixed line and mobile telephony, Internet, data network, and wireless network services. The company also publishes telephone directories and operates Xtra, the country's leading Internet access provider.

What types of broadband services are available in New Zealand?

Fixed-line broadband and telephone services were largely provided through copper-based networks, but fibre-based services now represent the majority of connections. Spark New Zealand, One NZ, and 2degrees provide most services, while a number of smaller mobile virtual network operators also exist.

When did Telecom New Zealand start offering mobile phone services?

Telecom New Zealand had begun to offer mobile telephone services in the late 1980s. That market brought the company its next major competitor, when BellSouth entered the New Zealand market in 1993 and established its own mobile network.

Who owns Telecom New Zealand?

Telecom Corporation of New Zealand, a "state-owned enterprise," is created as part of the government's plans to deregulate the domestic telecommunications market. Deregulation is completed. Telecom New Zealand is privatized through sale to Ameritech and Bell Atlantic for NZ\$4.25 billion.

What happened to Telecom New Zealand?

Back at home, Telecom New Zealand moved to consolidate its position in the fast-growing mobile telephone sector, buying up most of its mobile telephone network resellers. The company also began establishing partnerships with other companies, notably Microsoft, which invested more than NZ\$200 million in Telecom New Zealand.
