

Northern house balcony has solar panels

Do solar panels need a balcony?

Balconies that receive direct sunlight for a significant portion of the day are ideal. Obstructions like tall buildings or trees can limit the amount of sunlight your panels receive, affecting their efficiency. Balconies must be able to support the weight of solar panels, mounting structures, and potential wind loads.

Is balcony solar reshaping the solar industry?

This change has exploded adoption and is reshaping the industry. In the United States, off-grid "Balcony Solar" systems are allowed but grid-tied "Balcony Solar" is not allowed by the US electrical code because back-fed outlets are prohibited -- except for in Utah (March 2025)!

What is balcony solar?

"Balcony Solar" or "Balkonkraftwerk" is fairly new in Europe, but is growing rapidly. In Germany, a monumental electrical code change now allows up to 800 watts of solar power to be easily grid-tied using a normal household outlet in combination with certain equipment, requiring a permit but no electrician.

Is balcony solar allowed in the US?

In the United States, off-grid "Balcony Solar" systems are allowed but grid-tied "Balcony Solar" is not allowed by the US electrical code because back-fed outlets are prohibited -- except for in Utah (March 2025)! We have hope that this policy may change to align with the European model.

Where can I buy solar panels?

Solar panels are widely available. Online marketplaces like Amazon, Craigslist and Facebook Marketplace are a good place to start. Panels operate best when facing the sun, but don't be afraid of an imperfect alignment. You'll want to find a panel that fits your space and your install options. Buy new panels for the best quality and warranty.
