

Outdoor power supply drops to thousands of dollars

How much does a power outage cost?

ITIC reported that 98 percent of organizations say one hour of downtime costs over \$150,000. Ensure you know how much a power outage would cost your business each hour. To calculate the cost of downtime per hour, add labor costs each hour to the revenue lost each hour.

Why is outdoor power equipment so popular?

The current trends of remote and hybrid working models, as well as flexible working hours among businesses in the U.S., have ensured that people have more free time on their hands to indulge in gardening and landscaping, thus strengthening the U.S. market demand for outdoor power equipment.

What are the different types of outdoor power equipment?

There is a significant demand for different types of outdoor power equipment such as lawn mowers, chainsaws, and blowers among the U.S. population, due to which companies are increasingly focusing on launching advanced products in the market.

What happens if a business is not prepared for a power outage?

Power outages can occur at any time, and if businesses in the following industries are not prepared, they may experience significant downtime and loss of revenue: Data Centers: Data centers contain an organization's IT operations and equipment. These centers store, organize, manage and process a company's data.

How does power disruption affect the supply chain?

Power disruptions can cause a dramatic effect through the supply chain. Decreased Employee Productivity: Downtime due to power outages has an impact on employee productivity. Employees may not be able to complete their tasks when key equipment is down.

How long does a power outage last?

Half of U.S. outages caused by major events last longer than 12 hours, and more than a third last longer than a day, according to the National Renewable Energy Laboratory. That translates to more days when outdoor air is affected by people firing up their generators.
