

Outdoor power supply prices in Peru

How many types of electrical outlets are there in Peru?

There are three different types of electrical outlets in Peru. One outlet (Type A) accepts a flat parallel two-prong plug, and another (Type B) takes a three-prong plug. Outlets A and B are the same as those found in the United States. The third type of outlet (Type C) accepts a circular two-prong plug.

Do I need a voltage converter in Peru?

If your device operates on a different voltage (such as 110V, which is common in the U.S.), you will also need a voltage converter to safely use your devices in Peru. Electrical outlets in Peru are often designed to incorporate both plug types (see first image below). A round-prong plug as used in Peru.

What type of outlets are used in Peru?

Type A Outlets Type A outlets are the most commonly used in Peru. They feature two flat parallel prongs. However, there's an important distinction to note: Peruvian Type A outlets typically accept two identical flat prongs. This is different from the polarized Type A plugs found in the United States, where one prong is wider than the other.

What voltage is used in Peru?

When traveling to Peru, it's important to be aware of the supply voltage, as it can differ significantly from what you're used to at home. In Peru, the standard voltage is 220 volts at 60 hertz. This is much higher than the 110-120 volts typically used in countries like the USA.

Do you need a plug in Peru?

Most plugs in Peru are the two-pronged flat type found in the US, but a three-pronged and a two-pronged circular type are also found. An adapter may be necessary depending on which type your devices use. While hotels generally have two different types of outlets, it is usually best to just come prepared with an adapter for all situations.
