

PV Inverter Extended Warranty

Do inverters have extended warranties?

Some manufacturers offer extended warranties for an additional cost, but coverage varies. While a standard inverter warranty typically covers defects and failures, extended warranties may extend coverage for parts, but not always labor or service costs. Some manufacturers provide refurbished replacements instead of new units.

How do I choose the best warranty for solar panel inverters?

It is important to select the best warranty for solar panel inverters for the following reasons: System Reliability: If an inverter malfunctions, the entire solar system produces less energy, and having a warranty provides you assurance if anything goes wrong.

How long do inverter warranties last?

Inverter warranties vary by manufacturer and inverter type. String inverters typically come with 10-12 years of warranty coverage, whereas microinverters and power optimizers are often covered for 25 years.

Does a string inverter have a warranty?

Most string inverters come with a 5- to 12-year warranty, though some manufacturers offer extended warranty options for added protection. Since a string inverter failure affects multiple solar panels at once, it can cause significant system downtime. Some warranties cover replacement costs, but labor and shipping fees may not always be included.

How long does a SolarEdge inverter warranty last?

Most standard string inverter warranties last between 5 and 12 years, and inverter failure during this period can result in complete system shutdown, leading to lost solar production and unexpected costs. A longer SolarEdge inverter warranty can help protect against expensive replacements and provide peace of mind.

What is a warranty on a power inverter?

The warranty terms vary for different types of inverters. For example, string inverters have a 12 to 20-year warranty, whereas microinverters and power optimizers come with a 25-year warranty.
