

Pack battery helium inspection equipment

A leader in energy technology required a turnkey leak test system allowing for easy loading and unloading of large battery packs. The system utilizes a sniffer probe to detect helium in an air ...

The HJ181 suction gun helium inspection equipment is specially designed for new energy vehicle battery packs. With an extreme sensitivity of 0.001 ppm/s and a helium recovery rate of 95%, it ...

We are dedicated to providing quality New Energy Vehicle Battery Direct Cooling Plate Helium Inspection Machine for customers. We provide you with the best products and the best after ...

Currently, the common practice in the battery manufacturing industry is to test cell packaging prior to final assembly. For example, to look for defects, a ...

PTI are leaders in packaging technologies and inspection that develop package integrity testing standards and offer entire solution for package inspection technologies.

By combining the most diverse hardware and software modules, Batterie Inspektor(TM) delivers innovative, automated, and digitalized battery testing at every stage of manufacturing.

Application: Precision helium leak detection for prismatic, cylindrical, and pouch battery cells to ensure airtight sealing and safety compliance in battery manufacturing processes.

The automatic helium inspection machine for automotive parts developed by HCTE uses a high-precision helium mass spectrometer leak detector, which can complete the battery pack ...

A leader in energy technology required a turnkey leak test system allowing for easy loading and unloading of large battery packs. The system utilizes a ...

Founded in 2008, STT has been committed to the leak test industry, providing professional equipment and service for the safe, environmental protection and ...

The application of helium detection technology in the manufacture of power batteries is mainly reflected in its high sensitivity, fast response and non-destructive testing characteristics, thus ...

This equipment is a standard equipment developed for lithium battery PACK package sealing testing. The host equipment is equipped with a helium mass spectrometer sniffer for leak ...

In the new energy industry, we have developed a complete set of helium inspection equipment from cell to pack. UHT has provided industry customers with an original air tight helium ...

Marposs designs leak testing machines using helium as a tracer gas in an accumulation chamber or vacuum chamber for testing both modules and fully assembled battery packs. Additionally, ...

180s/PC Battery Testing Equipment for EV Lithium Battery Pack Sniffer Helium Leak Test, Find Details and Price about Performance Testing Equipment Helium Leak Test from 180s/PC ...

Hubei walsheng Intelligent Equipment Co., Ltd. specializes in the production of helium mass spectrometer leak detector, air tightness tester, fluorine oil leak detector, ultrasonic leak ...

This equipment is a standard equipment developed for lithium battery PACK package sealing testing. The host equipment is equipped with a helium mass ...

UHT is a national high-tech enterprise specializing in the R& D and manufacturing of helium detection equipment and providing customers with high-quality leakage detection solutions. ...

Marposs designs leak testing machines using helium as a tracer gas in an accumulation chamber or vacuum chamber for testing both modules and fully ...

Leak test on larger battery modules, packs and housing (including power electronics) after final assembly by means of the pressure decay/ flow test or with tracer gas.

The automobile battery helium detector is a device used for detecting the helium gas leakage of the new energy vehicle battery cover, which adopts the helium mass spectrometry leak ...

A battery pack leakage detection system and detection method are provided. The system includes a test container, a gas filling subsystem, a gas stirring subsystem and a test analysis ...

Nous nous engageons à fournir de la qualité; Sniffer-Type Power Battery Pack Scellant Équipement d'inspection d'hélium HJ181 à nos clients. Nous vous fournissons les meilleurs ...

Based on the traditional helium detection method, the back-pressure helium detection for sealing is introduced. The sealing, peripheral welding, and overall detection of the pole column are ...

Equipment overview of Helium Leak Testing Equipment: This equipment is mainly used for air tightness detection of PACK battery pack, including evacuation, helium filling, pressure and ...
