

# Photovoltaic cell module export price

What data is included in the photovoltaic industry report?

This report includes summary data for the photovoltaic industry from annual and monthly respondents. Data include manufacturing, imports, and exports of modules in the United States and its territories. Summary data include volumes in peak kilowatts and average prices.

What is PV module tech USA?

PV ModuleTech USA, on 16-17 June 2026, will be our fifth PV ModuleTech conference dedicated to the U.S. utility scale solar sector. The event will gather the key stakeholders from solar developers, solar asset owners and investors, PV manufacturing, policy-making and all interested downstream channels and third-party entities.

Where did photovoltaic cost data come from?

Photovoltaic cost data between 1975 and 2003 has been taken from Nemet (2009), between 2004 and 2009 from Farmer & Lafond (2016), and since 2010 from IRENA. Prices from Nemet (2009) and Farmer & Lafond (2016) have been converted to 2024 US\$ using the US GDP deflator, to account for the effects of inflation.

How much does a top-five module cost in 2025?

A top-five module maker told OPIS that 2025 loading prices have not meaningfully increased, even with higher upstream costs. Current offers from leading manufacturers of utility-scale projects are in the low-\$0.080/W range. The FOB China TOPCon module price for the first-half 2025 loading was at \$0.085/W, with values between \$0.082-0.087/W.

How much do Topcon modules cost?

One developer source says they are seeing \$0.29/W to \$0.32/W quoted for TOPCon modules from "preferred" manufacturers in countries subject to the ongoing AD/CVD case, while American producers assembling modules with Indonesian cells are offering prices in the low 0.20s/W.

Why are US module prices so high?

A range of factors related to import duties and changing tax rates in China has driven up US module prices. Image: Luke Price via Flickr.

Despite progress, India remains dependent on imports for photovoltaic cells and wafers, as domestic wafer production is yet to be established. Indian manufacturers are ...

IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies "Thin film a-Si/u-Si or ...

The import duty differential of 20% between cells and modules may encourage production of cells in India to

# Photovoltaic cell module export price

be integrated into module making. More ...

Average export price: \$0.10/W (flat MoM). Jan-Jun total exports: ~119.21GW. Module prices continued rising, driven by upstream polysilicon, wafer, and cell cost increases. ...

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry.

The total value of global PV-related trade - including polysilicon, wafers, cells and modules - exceeded USD 40 billion in 2021, an increase of over 70% from 2020.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market.

Indian solar exports rose 227% year-over-year (YoY) to \$1.8 billion (~INR152.6 billion) in CY 2023 from \$561 million (~INR46.4 billion), according ...

3. Stabilization of Solar Cell Prices Despite the historically low prices of solar cells from China, further price reductions seem unlikely. Experts ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

US solar module prices are increasing due to unexpectedly high AD/CVD cash deposit rates, making imports from Southeast Asia less viable, according to the latest pricing ...

For each country, we show cell imports, cell exports, and module exports that make up more than 1% of the country's total imports/exports. Different colors represent the ...

India's solar module exports were 91% up to \$1,969.13 million in fiscal 2023-24. USA was the biggest destination with modules shipments to ...

**Key Findings** The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and FY2024, primarily to the US, which ...

**Opinion** China's solar growth sends module prices plummeting Excess capacity in solar manufacturing creates challenges for the US and other countries attempting to develop ...

As the demand for solar PV grows globally, China - the world's largest solar PV factory - continues to remain busy rolling out products across the supply chain to meet this ...

## Photovoltaic cell module export price

Solar cell prices is expected to remain firm amid policy direction. Supported by rising cost change and producers" willingness, cell prices are expected to remain above the average cash cost ...

Data include manufacturing, imports, and exports of modules in the United States and its territories. Summary data include volumes in peak kilowatts and average prices.

Solar cell prices is expected to remain firm amid policy direction. Supported by rising cost change and producers" willingness, cell prices are expected to ...
