

# Photovoltaic panel prices in Georgia

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 12.35 kW solar panel system to cover their electricity needs, which comes out to \$31,703 before incentives. Prices range from \$26,948 to \$36,458, but after the federal tax credit, that drops by 30%.

Are solar panels a good investment in Georgia?

Solar power is blooming in the Peach State. Georgians use more energy every month than most Americans, which means installing solar panels in the area is more beneficial from a financial perspective than in most states. However, the high solar panel cost in Georgia can be a deterrent for many homeowners.

How much energy does Georgia get from solar panels?

Georgia currently gets nearly 3.5% of its electricity from solar panels, which is enough to power more than 359,000 homes. Georgia solar panels can help residents save \$1,700 on energy bills each year. Discover the potential savings with Choose Energy.

Do solar panels increase home value in Georgia?

Yes, solar panels increase home value in Georgia. Typically, you can expect to boost your home's value by around 4.1%. Based on the average Georgia house price, that's an increase of \$12,204, a significant increase.

Should you buy a solar battery in Georgia?

You can store free solar energy for use when your panels stop producing, maximizing your savings over time. This is particularly beneficial in areas with higher energy costs, like Atlanta. Batteries also let you maintain power through blackouts, which are common in Georgia due to the extreme weather.

Are solar panels tax deductible in Georgia?

For example, if you spend \$15,000 on your residential solar system, you'll be eligible for a \$3,900 tax credit from the federal government. The average monthly electricity bill in Georgia (as of May 2021) was \$148.53, which would equal approximately \$1,782 per year.
