

How can energy storage products be integrated?

Integration of energy storage products begins at the cell level and manufacturers have adopted different approaches toward modular design of internal systems, all with the goal of improving manufacturing efficiencies, reducing maintenance time and improving operational reliability.

Do energy storage systems need to be listed?

It is critical for projects moving forward that execution teams understand that the International Fire Code (IFC), NFPA 855 and NFPA 70 (the National Electric Code) require energy storage systems to be listed, and that UL 9540 is the listing standard applicable.

What is the energy storage guidebook?

The Guidebook provides local officials with in-depth details about the permitting and inspection process to ensure efficiency, transparency, and safety in their communities. You can download the full Energy Storage Guidebook [PDF] or access individual chapters below.

What is the battery energy storage system guidebook?

A public benefit corporation, NY SERDA has been advancing energy solutions and working to protect the environment since 1975. The Battery Energy Storage System Guidebook contains information, tools, and step-by-step instructions to support local governments managing battery energy storage system development in their communities.

Where can I find information about energy storage regulations in New York City?

Updates and resources can be found on the Working Group's webpage. You can download NY SERDA's New York City [PDF] factsheet to learn more about energy storage regulations in New York City. The Trainings for Local Governments page offers additional resources including recordings and materials from NY SERDA's battery energy storage system trainings.
