Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

Can a portable power station charge a phone?

Some can only charge phones, and others can power your entire house. Check the output wattage and battery capacity to see what a portable power station is capable of. The Westinghouse iGen160s is a basic little power station capable of keeping your electronics charged during a brief power outage or camping trip.

What is the best budget portable power station?

If you're looking for the best budget portable power station with premium features, the Jackery Explorer 1000 v2 checks all the right boxes. Whether it's for emergency use, mobile work, or sustainable living, it offers a powerful, compact, and user-friendly solution that's built to last. Check Price on Amazon 2.

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO<sub>4</sub> battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO<sub>4</sub> power stations will last for more than 3,000 charge cycles, or about 10 years.

Should you buy a power brick or a portable power station?

Small power bricks have enough juice to charge your phone a few times, while a cooler-sized portable power station can keep vital electronics running during a power outage or camping trip, and the most powerful options will provide electricity to your entire house.

How long does a portable power station take to recharge?

That depends on the capacity of your portable power station, the wattage of your solar panels, and the weather. For example, a 1,000Wh power station that's receiving a consistent stream of 200 watts of power from a solar panel would take about 5 hours to recharge ( $1,000/200=5$ ). Are portable power stations weather resistant?
