

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar ...

In Portugal, electricity generation within the Solar Energy market is anticipated to reach 7.20bn kWh in 2025. The sector is expected to experience an annual growth rate of 22.84%, ...

During 2024, the National Transmission Grid (RNT) of Portugal connected 776 MW of photovoltaic installations to the grid, which allowed for the installed capacity to be doubled, ...

The sector emphasizes the importance of investing in the national electricity grid and new storage technologies. The goal is to double Portugal's installed capacity by the end of ...

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar energy in Spain and Portugal.

Solar helped Spain's electricity system recover Advocates of renewable energy emphasise that solar and wind are reliable energy sources, ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage ...

Portugal has taken a bold leap into the renewable future with the launch of one of Europe's largest floating solar farms, built atop a serene reservoir. This innovative project ...

This ambitious program, set to run until December 2025, is designed to support large-scale projects that drive the transition to a sustainable, environmentally friendly ...

Spain and Portugal's power outages show a critical gap in Europe's clean energy plan. BESS is key to C& I and national grid stability?

Two solar-plus-storage projects are among five planned renewable energy sites whose details have been published for public consultation on the Portuguese Environment ...

The Portuguese Ministry of Energy has allocated EUR100 million for grid flexibility and energy storage projects to be completed by the end of 2025. This initiative aims to enhance ...

Portugal's Ministry of Energy has allocated EUR100 million to support 43 energy storage projects, scheduled for completion by the end of 2025. These projects were selected ...

Portugal plans to hold an energy storage auction before January 2026 as part of a EUR400 million (\$462.2 million) initiative to enhance grid resilience following an April blackout.

Portugal has emerged as a leader in renewable energy, leveraging its geographical advantages and robust policy frameworks. The country's renewable energy sources, including ...

Under the updated energy strategy, Portugal targets 80% of its electricity to come from renewable sources by 2026 and aims to reach an impressive 85% by 2030. The plan ...

Portugal's Ministry of Energy has announced that it has allocated EUR100 million (\$104.2 million) to 43 energy storage projects which should be installed by the end of 2025. A ...

Polish renewables company R.Power is looking to develop 680 MW of standalone battery energy storage system (BESS) projects in Portugal in support of the government's ...
